

Mikhail Nasyrov

Full-stack Developer, Technical Lead

mikhail@mnasyrov.com

Summary

Full-stack developer of web applications, Technical lead. Extensive experience in analysis of business and user requirements, software design. Strong DevOps skills.

Initiative, responsible, communicative. Interested in learning and applying new technologies, improving processes in a team.

Experience

Senior Software Engineer, Technical Lead at Xored Software Inc

October 2011 - December 2015 (4 years 3 months)

Responsibilities:

- * Analysing business and product requirements;
- * Architecture design of applications and systems;
- * Analysing and selecting frameworks and tools;
- * Prototyping;
- * Development of web and server applications;
- * Organising a team work;
- * Mentoring team mates.

Projects:

* Spirent Velocity (iTest Lab Optimizer) - an integrated lab management and test execution solution for elastic test labs. It coordinates, orchestrates, manages and monitors physical and virtual environments as well as facilitates lab consolidation. It allows testers to create and execute complex test scenarios while its multi-user reservation system prevents resource conflicts (Spirent Communications, <http://www.spirent.com/Products/velocity>).

Key skills: Java 8, JavaScript (ES6), Python, C++, JavaEE, HTML5/CSS3, Angular, React, Django, PostgreSQL, Jenkins CI, Wildfly, Hibernate, Tapestry, Junit/Arquillian.

* Cisco Prime Infrastructure - a single integrated solution for complete lifecycle management of Cisco routers, switches, and wireless devices, along with deep visibility into end-user connectivity and application performance (Cisco, <http://www.cisco.com/c/en/us/products/cloud-systems-management/prime-infrastructure/index.html>).

Key skills: Java, JavaScript, Spring, Tomcat, HTML/CSS, Dojo, Hibernate, JUnit.

* LogAnalyzer - a plugin for Jenkins CI server which analyses big build logs by a custom PEG-parser and provides structured and easy-navigable output.

Key skills: Fantom, JavaScript, Junit, HTML, Maven, Jenkins.

Software Engineer

January 2008 - August 2011 (3 years 8 months)

Development of web and desktop applications: analysis of product requirements, search for solutions, estimations, implementation, testing. Participated in designing of application architecture and solved performance issues of applications and databases.

Projects:

- * Yuki - financial accounting service for small business (<http://yuki.nl>);
- * Simultop - financial risk management software (Themasoft B.V., <http://www.themasoft.nl>);
- * MOEPS - reporting system for vessels (Norient Product Pool ApS, <http://www.norientpool.com>);
- * CloudCasting - content broadcasting service (<http://cloudcasting.eu>);
- * Family+Friends - online family organizer (<http://familyware.nl>).

Key skills:

C#, VB.NET, ASP.NET, WPF, WinForms, MS SQL, JavaScript, AJAX, JQuery, NUnit, NAnt, MSBuild.

Software Engineer at ARL Consulting B.V.

July 2007 - December 2007 (6 months)

Web-application development: task analysis, estimations, implementation, testing.

Projects:

- * e-Yield Platform - online booking system for cargo business (<http://arl-shipping.com/shippingprocess/ey-home>).

Key skills:

C#, ASP.NET, MS SQL, JavaScript, HTML, CSS, web services.

Software Engineer at Softomate

July 2005 - September 2005 (3 months)

Development of extensions for Mozilla Firefox browser using JavaScript, HTML/CSS and XUL.

Education

Novosibirsk State Technical University

Master of Science, Information Technology and Computer Engineering, 2001 - 2007
